FOR WEB3, MERCHANTS & MODERN BUSINESS

Powered by a Licensed Electronic Money Institution (EMI)

Stabillon provides regulated infrastructure for seamless digital payments and global operations — delivering flexible, compliant, and scalable financial infrastructure tailored for Web3 innovators, online merchants, and modern B2B businesses across the EU and EEA.

WHAT WE OFFER

Corporate Account

Universal, operational corporate account — inbound & outbound

Pay Own

For internal fund management and segregation

Pay Client

A pool of vIBANs for end customers, EMI onboarding

Pay In Only

Pool of vIBANs for end parties for incoming payments

We support the following payment schemes

SWIFT | SEPA | ELIXIR | SEPA express | Faster Payments | BLIK | KIR

WHY STABILLON

Global Reach
Support for major currencies and payment networks.

API Driven
Developer-first API with clear documentation.

Web3 Expertise
Built for the unique needs of blockchain and crypto businesses.

With Stabillon, you get the compliance and stability of a regulated institution — and the speed, modularity, and openness of next-gen fintech.

Aleje Jerozolimskie 123A
02-017 Warszawa, Poland
KNF e-money licence: KIPE1/2019

ABOUT STABILLON

StaBillon Sp z o o *is a licensed Electronic Money Institution authorised by the Polish Financial Supervision Authority (KNF) under licence no. KIPE1/2019. We operate our own DLT-based digital-cash platform — in production with regulated enterprise clients in banking, FMCG and the public sector since 2021.*

Account and Payments *is a set of account solutions to support businesses operating in both traditional and digital finance ecosystems. Whether you need efficient fund collection, streamlined corporate transactions, or payment solutions, we offer secure and compliant options tailored to your needs. E-money accounts allow to store and manage digital funds with full compliance, offering a reliable alternative to traditional banking. There are several options, like: Corporate Account, Pay-Own Subaccount, Pay-Own Subaccount, and Pay-Own Subaccount.*

The same rail handles insurance claim payouts, agent and broker commissions, gig-economy compensation, contractor payroll, customer refunds, and loyalty and reward disbursements. Built-in KYC follows a three-phase process pre-approved by KNF (~80% fully automated, 15% photo-assisted, 5% live video). The end-to-end flow is GDPR-compliant and produces a durable-medium audit trail by default.
